

June 04, 2018.

To Whom It May Concern:

Degree in physics Alexis Legón has asked me to submit a recommendation letter to support his application for the event **Mathematical & Conceptual Aspects of Quantum Theory**, which will take place from June 20 to 22, 2018 at the Centro de Ciencias Matemáticas UNAM, in Morelia, Michoacán, Mexico. I have known Alexis for two years as a student in courses related with the IVIC postgraduate program.

Alexis distinguished himself as one of our best students. His academic work has been good. He has a strong interest in working with Quantum Games in Quantum Information Theory, so I highly recommend his participation in the event.

At present, the academic institutions of Venezuela face a severe economic crisis and a tight exchange control, which prevents our students from participating in international academic events, which is why I request, please, economic support for Alexis. Please feel free to contact me at lgonzale@ivic.gob.ve

Sincerely,

Research Associate III-2.
Venezuelan Institute for Scientific Research.
