

**CENTRO DE INVESTIGACION Y DE ESTUDIOS AVANZADOS
DEL INSTITUTO POLITÉCNICO NACIONAL**

Mexico City, May 15, 2018

To the Organizing Committee of the MCAQT Conference:

I am writing in recommendation of **Leonardo Ismael Salinas Maya, 2nd semester master student at the CINVESTAV Physics Department**, for his application to the Mathematical & Conceptual Aspects of Quantum Theory (MCAQT) Conference and fellowship request.

I have known Leonardo for about 6 months, since he attended my class in Advanced Quantum Mechanics (QM). His grades are among the highest of his class. During my course, I found that Leonardo is a hardworking and curious student. In particular, he showed a lot of interest on the conceptual aspects of QM (mathematics, EPR, interpretations, etc.). He will start his thesis research once he finishes the basic courses, next August. Apparently, Leonardo wants to develop his research on a topic related to QM and its foundations.

In summary, Leonardo is a responsible and hard-working student, interested in the conceptual aspects of the quantum physics. I believe that he is good candidate to participate in the MCAQT Conference and, hence, I highly recommend him.

Sincerely,

Dr. Ivan Heredia de la Cruz
CONACyT researcher
Physics Department, CINVESTAV
